	GATULINE® RADIANCE	PROPANEDIOL, EVODIA RUTAECARPA FRUIT EXTRACT	GATTEFOSSÉ	2.00
				100

Operating instructions

- Solubilize phase A1.
- In another vessel prepare phase A2, making the premix with glycerin and xanthan gum. Once homogeneous, add into A1 and disperse with rotor stator (2000 RPM) for 5-10 minutes. Check the homogeneity.
- In the main vessel, weigh phase B. Disperse the Bentone gel® with rotor stator (2000 RPM) for 5-10 minutes. Check the homogeneity.
- Proceed with the emulsion: Add slowly (A1+A2) into B and increase step by step the mixing speed until reaching 3000 RPM, for 10-15 minutes.
- Under moderate stirring, add ingredients of phase C one by one.

Radiance & Glow Cream

2470-1.25

+ Skincare x Make-up

+ Healthy glow

+ Cold process

Description

Radiance & Glow Cream is a 2-in-1 formula combining both a nourishing and illuminating serum with a highlighter that will leave your complexion bright and even. **Emulium® Illustro**, the W/O emulsifier designed for make-up and suncare, can also create skincare formula with a pleasant addictive sensory, here is an example! **Gatuline® Radiance**, an extract of *Evodia Rutaecarpa* fruit, is an active ingredient that improves the evenness and radiance of the complexion, reducing the signs of redness thanks to its action on the microcirculation of the skin: a good way to combine skincare and make-up.

Specifications

- + Aspect: Slightly pink fluid cream
- + pH: NA
- + Viscosity Brookfield RV (spindle A, speed 5): approx. 9400 mPa.s after 24h
- + Natural origin > 99% (ISO 16128)

Ingredients

- **Emulium® Illustro** is a natural origin W/O emulsifier that gives its pleasant sensory to the formula, and of course its stability. It is compatible with cold and hot process.
- The balance between the emollience and spreadability of **Labrafac™ CC MB** and the powder touch of Cetiol® OE play an important role in the sensory of the formula. Those emollients have a good compatibility with **Emulium® Illustro**.
- The two salts in aqueous phase enable to avoid Ostwald ripening.
- SATIAXANE™ VPC 911 improves the spreadability and the playtime of the formula.
- Bentone Gel® EUG V is a thickener and stabilizer of oil phase. It has suspensive properties.
- **Gatuline® Radiance** enhances microcirculation and therefore improves all aspects of a radiant complexion, including skin color and luminosity.
- MST-3 DK PEARL SILVER 2 is a lipophilic coated pearlescent pigment. As the external phase is the oil phase, it is always recommended to choose a lipophilic coating for the pigments.
- UNICERT RED 07004 is a dye that gives a light pink shade color to the formula.
