## Operating instructions

- Heat water to 70-75°C and disperse phase A2 under mixing.
- Prepare and heat phase B to 80°C.
- Under rapid mixing, at 70°C, add slowly phase B to phase A1+A2 to create the emulsion.
- Cool under rapid mixing (dispersing mixer) and at about 25°C, add C, D and E.
- Complete cooling under rapid mixing (dispersing mixer 5 min).

## Comforting Body Balm

2657-1.12

- + Butter texture
- + Moisturizing
- + Melting sensation

### Description

If you have dry or sensitive skin, this is the balm you need. This O/W emulsion melts on the skin and gives an instant sensation of comfort. The skin is moisturized without being greasy. Emulium® Dermolea MB is particularly adapted to sensitive skin and it emulsifies more than 30% of oil phase without a co-emulsifier in this formula.

### Specifications

- + Aspect: Ivory butter cream
- + pH: 5.6 ± 0.5
- + Viscosity Brookfield RV (spindle D, speed 5): approx. 200000 mPa.s after 24h
- + Natural origin > 98%

### Ingredients

- **Emulium® Dermolea MB** is a 100% natural origin O/W emulsifier which supports the skin barrier function and reduces skin sensitivity. Used at 4%, it emulsifies more than 30% of oil phase without any co-emulsifier.
- SATIAXANE™ VPC 911 is a natural origin aqueous gelling agent.
- **Compritol® 888 CG MB** is an oil thickening agent which contributes to the butter texture.
- **Lipocire™ A SG** is a lipophilic texturizing agent that brings a melting sensation thanks to its melting point close to body temperature.
- Cetyl Alcohol is a long chain fatty alcohol bringing body to the cream.
- **MOD MB** and LEXFEEL™ N5 are emollients that help to improve the spreadability.
- **Gatuline® RC BIO** is a multipronged solution that stimulates cell oxygen consumption and increases skin hydration to minimize the appearance of wrinkles.
- **Gatuline® Renew** boosts epidermis renewal and strengthens the stratum corneum.
