	PERFUME KIWI	PARFUM	MLW	0.20
D	CITRIC ACID (10% SOL.)	WATER, CITRIC ACID	-	1.40
				100.00

Operating instructions

- Weigh phase A1 and heat to 70°C.
- Disperse phase A2 into phase A1 under moderate mixing.
- Prepare phase A3 by dispersing Kelcogel into water.
- Add phase A3 to A1+A2 under moderate mixing.
- Heat phase B to 70°C and emulsify. Add B into A and mix under high shear for 5 minutes.
- Cool down until 35°C and add one by one phase C.
- Adjust pH with phase D.

Chayote-Kiwi Sorbet

2694-3.03

+ Food like texture

+ Blurring effect

+ Photo aging protection

Description

Is it a chayote-kiwi sorbet or a granita?

Due to its light green texture, at first sight, it looks like an icy sorbet “granita” that you would love to eat. While rubbing, you feel a fresh, creamy and powdery skin feel. Once applied, this daily cream leaves a non-tacky, soft and dry afterfeel on skin thanks to Emulium® Mellifera MB. On top, Solastemis™ protects the skin from photo-aging.

Specifications

+ Aspect: Thick translucent green emulsion gel

+ pH = 5,5 ± 0.5

+ Viscosity Brookfield RV (spindle C, speed 5): approx. 104 000 mPa.s after 24h

+ 99,4% natural origin (ISO 16128)

Ingredients

- **Emulium® Mellifera MB** is an O/W emulsifier. Used at 3%, it brings a light afterfeel despite the high amount of glycols which are known to be sticky.
- **Labrafac™ CC MB** is an emollient which brings lubricity to the formula.
- Beaute By Roquette® ST 118 mixed with Kelcogel CG-HA are water soluble gelling agents that create a “sorbet” texture.
- Glycerin and 1,3 propanediol are humectants used in high amount to create a slightly translucent aspect and moisturize the skin.
- **Original Extract™ Kiwi** is a water extract of kiwi fruit which brings radiance & moisturizing properties.
- **Solastemis™** is an active ingredient which is clinically proven to shield the skin from UV-induced damage and even skin tone.
